Practical Implant Dentistry
A Mini-Residency in Implant Dentistry

Saj Jivraj, D.D.S., MS.Ed. and
Mamaly Reshad, D.D.S., MSc.

March 4-August 5, 2010

Six sessions 2:00 – 8:00 PM
Oxnard, CA

SAJ JIVRAJ, D.D.S., MS.Ed.

Course Director

Dr. Jivraj completed his dental degree at the University of Manchester, England and his advanced prosthodontic training at the University of Southern California. He is the former Chairman Section of Fixed Prosthodontics and Operative Dentistry at the USC School of Dentistry, and continues there as an Associate Clinical Professor in the department of Graduate Prosthodontics.

Dr Jivraj has published many articles on esthetic and implant dentistry and co-authored the textbook Treatment Planning in Implant Dentistry.

Dr Jivraj presents nationally and internationally on topics pertaining to implant dentistry and advanced prosthodontic procedures.

Dr. Jivraj is a member of the American College of Prosthodontists, the Academy of Osseointegration, the International Congress of Oral Implantologists and the Newport Harbor Academy of Dentistry. He is married with two children, and maintains a private practice limited to prosthodontics and implant dentistry in Oxnard.

MAMALY RESHAD, D.D.S., MSc.

Course Faculty

Dr. Reshad graduated with a BDS degree from King College Dental School in England. He completed an MSc Program in Restorative Dentistry at the Eastmann Dental Institute in London. Dr Reshad was awarded a Masters degree with distinction. He later completed his residency in Prosthodontics at USC School of Dentistry. He has published article in peer reviewed journals and has presented on topics related Implant and Restorative dentistry both nationally and Internationally. Currently he is Co-Chair Section of Fixed Prosthodontics and Operative dentistry at the USC School of Dentistry

TARGET GROUP

General dentists interested in providing dental implant treatment in their practice. No prior dental implant training required.

"The instructors were great. This was a fun, yet very educational course that provided real clinical experience. It was well worth the time and expense, and right in our own backyard!" -Ronald Guzman, D.D.S. Oxnard, California

COURSE OBJECTIVES & COURSE OUTLINE

Whether you are a just beginning or already have experience in dental implant treatment, the knowledge and skill you gain in this intensive and highly personalized residency (class size is limited to 8 participants) will allow dental implant treatment to become as routine as any other restorative procedure in your practice.

The emphasis of this course is on restorative techniques. This course includes didactic education, hands on experience both in the lab and on patients and an introduction into surgical techniques with a live patient experience. A study club portion will allow you to bring in patient cases for discussion and treatment planning.

Principles You Will Learn In The Residency:

Treatment planning principles:

- Straight forward vs. high-risk patients
- Which teeth to save or extract
- Immediate or delayed implantation
- Screw or cement-retained; splinted or single crowns; fixed or removable or hybrid prostheses
- Effective use of surgical stents
- Principles of full mouth reconstruction

Prostheses design principles:

- Single teeth and multi-unit fixed prostheses
- Implant supported overdentures
- Precision fixed/removable prostheses
- Provisional implant restorations
- Working effectively with your laboratory and controlling costs
- State-of-the-art implant esthetics

Teamwork and practice management principles:

- Techniques used in grafting and augmentation
- Working smoothly with the surgeon
- Marketing, fee structuring and practice management for dental implant care

This course is perfect for a general dentist of any level experience. The hands-on learning was great, and I definitely feel more comfortable with implant treatment. I enjoyed every session. -Mary White, D.D.S. Ventura, California

NEOSS

ABOUT NEOSS

Our desire at Neoss is to connect the dental professional and their patients with a system that provides for a safe and reliable treatment. By forging strong relationships that help us to understand and listen to a wide range of clinicians, academics, dental technicians and engineers from around the world, we've managed to create an implant system that redefines the word simplicity.
